ABSTRACT

According to the Vedas, the cow was considered as a most valuable animal and called as the mother of all. The cow urine therapy is capable of curing several curable and incurable diseases. During the past few years, cow urine therapy has provided promising and authentic results for the treatment of cancer. Cow urine enhances the immune-competence and improves general health of an individual, prevent the free radicals formation and act as anti-aging factor, reduces apoptosis in lymphocytes and helps them to survive, and efficiently repairs the damaged DNA, thus is effective for the cancer therapy. Cow urine helps the lymphocytes to survive and not to commit suicide (apoptosis). By regular use of cow urine one can get the charm of a youth as it prevents free radicals formation. The redistilled cow's urine distillate was found to possess strong antigenotoxic and anticlastogenic properties. DNA strand break, chromosomal aberration and micronucleus formation could be protected by redistilled cow's urine distillate. This property is mainly due to the antioxidants present in cow urine distillate.

KEYWORDS

Cancer therapy, immune-competence, apoptosis, cow urine.

INTRODUCTION

'The cow' (*Bos indicus*) is a mobile medical dispensary and cow urine is a panacea of all diseases. The cow urine therapy is capable of curing several curable and incurable diseases (Chatterjee and Mukherjee, 2020). According to the Vedas, the cow was considered as a most valuable animal and called as the mother of all (Shah et al.,
