Value Added Course,
on
"DISASTER MANAGEMENT"
Platform : Google Meet
DATE AND TIME - 23-27 AUGUST, 2021, 10.00 AM - 5.00 PM

Course Objectives :

- this course involves disaster- coping, pre- disaster strategizing and implementation of plans and strategies so that losses can be prevented, minimised, or even averted.
- throughout the course, students are trained to spot impending calamities and to handle such situations with organizational skills.
- trains students to help and serve, at the time of natural and man-made calamity.
- students who are interested in serving and rescuing people and conserving the life of citizens during disasters can pursue these courses.
- this course trains students in spotting impending failures or calamities and effectively handling such situations with their organisational skills.
- this course career prospects and job opportunities are ample. Various government and private agencies, and non-profit organisations are always on a lookout for trained professionals in this field.
- this course helps cope with a disaster and it also requires strategy for management.
- teach ways to respond to all types of risks that would occur in a community, and focuses on the implementation of practical methods to reduce the effects of natural or man-made crisis situations.
- train professionals who can appropriately prepare populations for a disaster before it occurs.
- students will learn information related to disaster response methods and effective ways of repairing any resulting damage.
- Disaster prevention activities focus on reducing vulnerability and strengthening communities nationwide by identifying various security needs.
- will also equip students with critical thinking and analytical skills necessary to lead in complex and dangerous situations.
